

## Company Profile / Stock Information (As of September 30, 2023)

### Corporate Profile

Corporate Name MIMAKI ENGINEERING CO., LTD.  
 Foundation August 1975  
 Capital 4,357 million yen  
 Business Activities Development, manufacturing, and sales of computer devices and software  
 Employees 2,057 (consolidated)  
 862 (parent company only)

### Board Members

President Kazuaki Ikeda  
 Managing Director Kazuyuki Takeuchi  
 Executive Director Koji Shimizu  
 Director Yasuhiro Haba  
 Director Nariaki Makino  
 Director Takeshi Kodaira  
 Director Shujiro Morisawa  
 Outside Director (Full-time Audit and Supervisory Committee Member) Yoh Zenno  
 Director (Audit and Supervisory Committee Member) Noriyuki Tanaka  
 Outside Director (Audit and Supervisory Committee Member) Makoto Tanaka  
 Outside Director (Audit and Supervisory Committee Member) Hisamitsu Arai  
 Outside Director (Audit and Supervisory Committee Member) Seiko Minomo  
 Outside Director Shunsuke Numata

Mimaki

Sustainability

Sustainability contributed by MIMAKI Solutions

Neochromato Process

We provide solutions that support our customers' sustainable business through our products and technologies.

See page 9

MIMAKI™  
 MIMAKI ENGINEERING CO., LTD.

We aim to be a market leader in digital on-demand production with our proprietary raster technology (for inkjets, etc.) and vector technology (for cutting plotters, etc.).

### Management Vision

- 1** We aspire to become a "Development-oriented Enterprise" with our own technology and our own brand of products throughout the world.
- 2** We aim to become a company that can adapt and quickly provide our products that will satisfy the customers.
- 3** We strive to become an innovator always providing "something new, something different" in the market.
- 4** We aim at creating a corporate culture where our individual employees can exploit their personal characteristics and abilities to the fullest extent.

### MIMAKI develops new organization and corporate image

To remain as a group of innovators and to fully exploit the personal characteristics and abilities of every employee, we began a new system with small groups called GIPS (Group Independent Profitability management system). We also reorganized into five divisions—Research and Development, Sales, Production, Administration, and Corporate Planning—so that we can promptly identify potential market needs and provide solutions.

With GIPS every group will now have a clear role and responsibilities and will work cooperatively as if each group were an independent small factory.

The added value as the "fruit" of the activities of each group will be made clear, and in order to improve the profitability of their own division, all members of the group (centered on a leader) will share issues and ways to resolve them. Through these activities, all employees will participate in management and everyone will have efficiency in mind.

In this way, we are looking to make our company an aggregate of "small fruits like a cluster of grapes."

Kazuaki Ikeda President

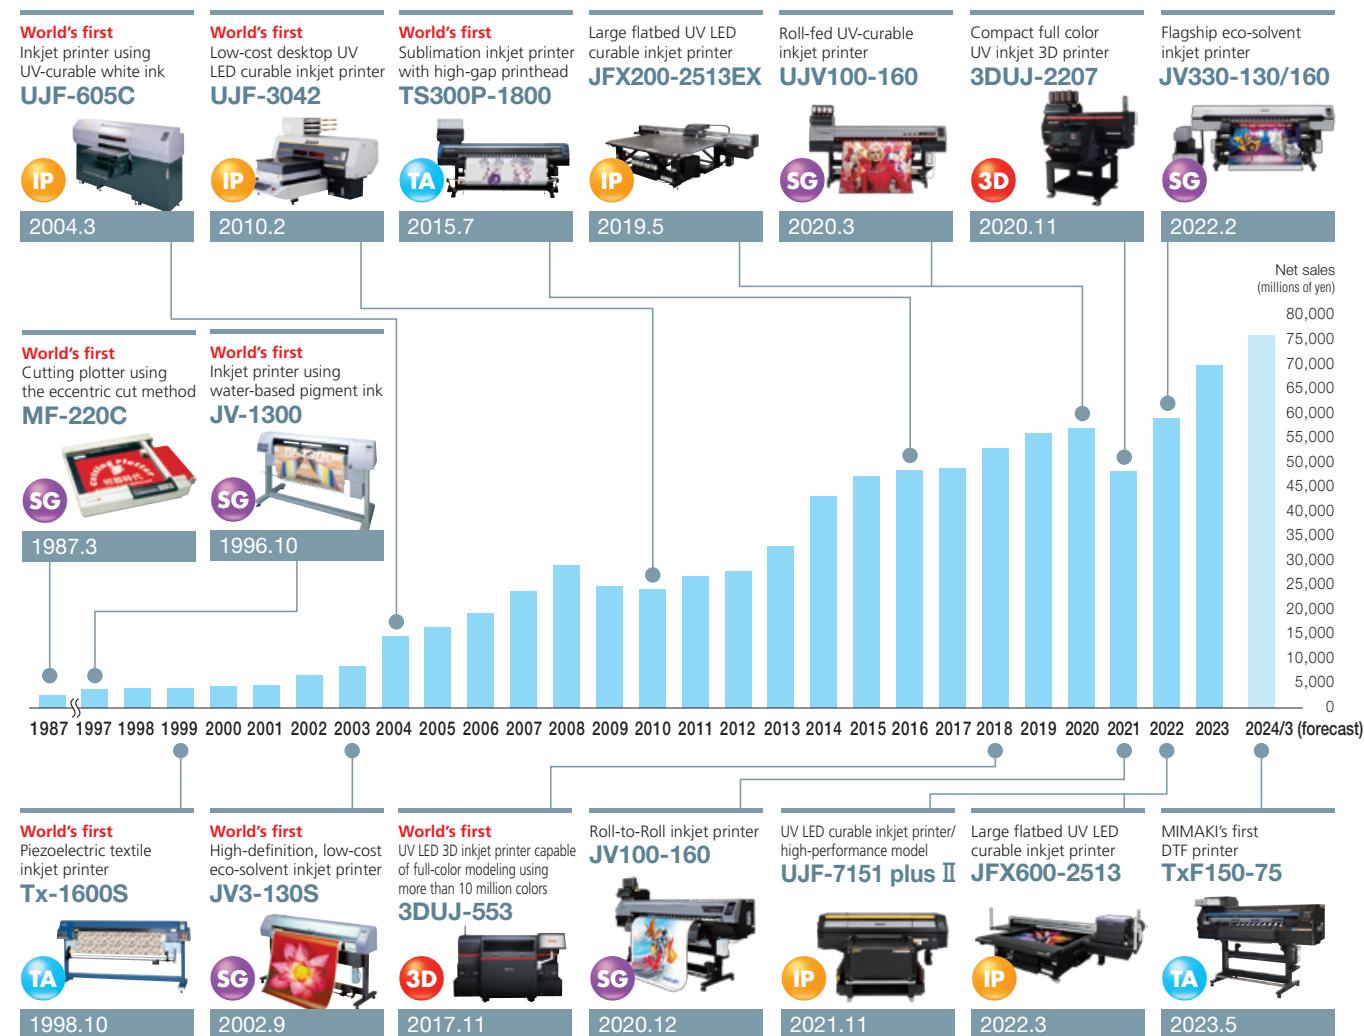

## Providing the total solution: supporting everything from introduction to the final quality of products

The MIMAKI Group is a development-driven group of companies that provides integrated services through the development, manufacturing, sales, and maintenance service of products, such as industrial inkjet printers, cutting plotters, and inks. By leveraging our proprietary core technologies, we will drive additional progress during the digital transformation and play our role as a solutions provider that supports everything from the introduction to the final quality of products.

## The history of MIMAKI: continual innovation

As a market leader in digital on-demand production, we will continue to create new markets and customers by identifying diverse needs promptly and accurately and by providing products that target these needs.

## Providing products for three markets and developing the FA business

Promoting the expansion of markets by always providing optimal products to the players in each market.

### SG Sign Graphics

Creating a variety of visual communication materials for business use, such as advertisements and signboards including large posters, car wrappings, soft signs, and display panels

Examples of applications

Main printing materials

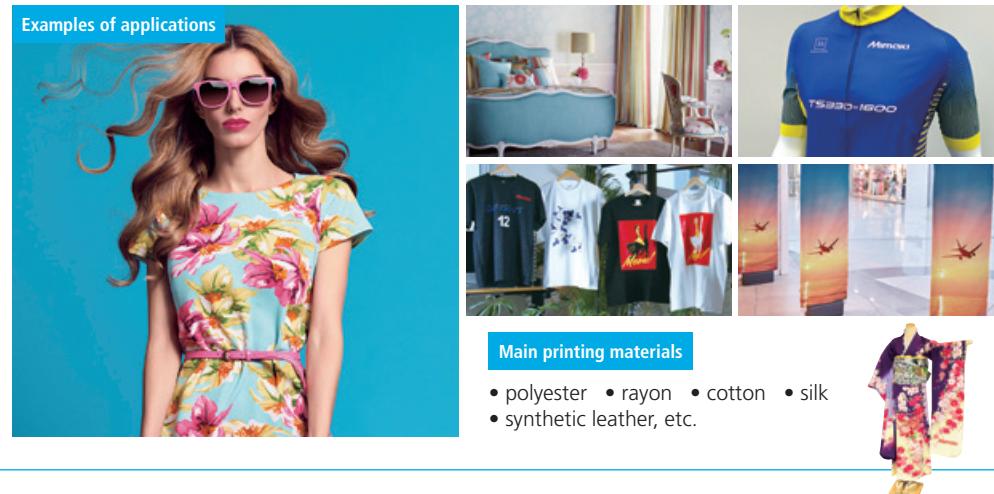

- PVC sheeting
- banner sheeting
- window film, etc.

## FA business

### TA Textile & Apparel

Meeting growing needs in the furniture industry as well as the fast fashion and sportswear industries with items such as cloth before sewing (textiles) and ready-made clothes (apparel)

Examples of applications

Main printing materials

- polyester
- rayon
- cotton
- silk
- synthetic leather, etc.

### IP Industrial Products

Printing for gifts, novelty items, custom-made goods for general consumers, and industrial products including instrument panels for automobiles, control panels for home appliances, and other products

Examples of applications

Main printing materials

- plastic
- acrylics
- glass
- metal
- wood, etc.

### 3D 3D Printer

Products used for 3D printing of product designs, figures, and even 3D signboards, offering everything from full-color modeling with more than 10 million colors to ultra-large models up to 1.8 m high.

Examples of applications

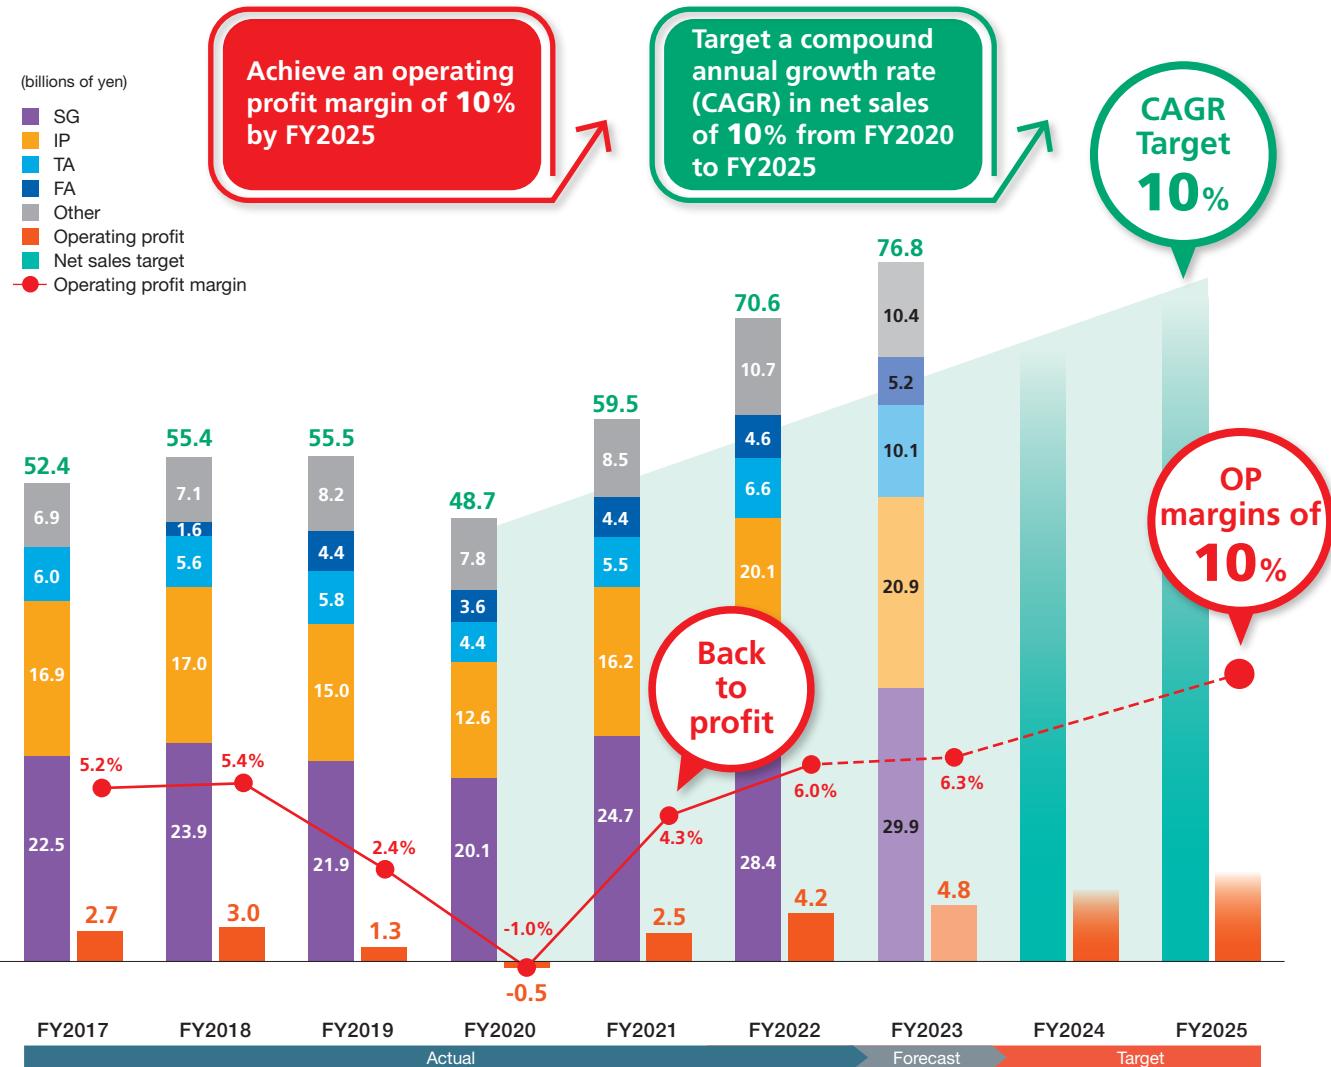

### FA Factory Automation

Developing five businesses based on vector and mechatronic technologies. The on-demand type digital coating machines can be used to fully automate the production processes from printing to coating.

# Medium- to long-term growth strategy **Mimaki V10**

MIMAKI is steadily implementing measures toward the targets set out in the "Mimaki V10" medium-to long-term growth strategy: an operating profit margin of 10% by FY2025 as well as ensuring a V-shaped recovery in business results.

## Message from Top Management

Here we provide a report on the state of business during the first half of the 49th term (from April 1, 2023 to September 30, 2023).

**Kazuaki Ikeda** President, MIMAKI ENGINEERING CO., LTD.

### Overview of business performance during the first half of the fiscal year ending March 31, 2024

In the first six months of the fiscal year ending March 31, 2024 (the first half), both net sales and profits increased. Net sales were 35,437 million yen (up 4.3% year on year), and operating profit was 2,331 million yen (up 23.7% year on year).

During the first half, the global economy remained generally uncertain amid continued high levels of inflation and the continuing impact of factors such as monetary policies by central banks and governments in various countries. In North America, the economy remained strong, recently centering on personal consumption, but in Europe, the economy continued to stagnate against the backdrop of the prolonged invasion of Ukraine.

Under such circumstances, the MIMAKI Group has continued to launch new products and expand sales, developed its business in anticipation of rapid changes in the market environment and customer needs, and laid a foundation to improve profitability based on the key measures set forth in the medium-to long-term growth strategy "Mimaki V10." In the first half of the fiscal year, the Company has been steadily pursuing strategies to expand sales in the future. Specifically, the Company announced new products and technologies at ITMA, the world's largest Textile & Apparel (TA) market equipment exhibition held every four years in Milan, Italy. It also established a sales subsidiary in Vietnam, where economic growth is remarkable. Moreover, the Company made another announcement of the simultaneous worldwide release of new UV printers UJV100-160 Plus and UCJV330 Series for the Sign Graphics (SG) market. Besides, the Okinawa Sales Office opened as the 17th domestic sales office in Japan.

Net sales for the first half increased, due in part to the positive impact of the yen's depreciation on foreign exchange in general. Sales to the TA market grew significantly due to strong sales of the Tx150-75, Direct to Film (DTF) machine, which was launched in the market this fiscal year. Sales of ink to the SG market remained strong despite a decline in sales of the main unit. Sales to the Industrial Products (IP) market were at the same level as the same period of the previous fiscal year when sales of new products expanded significantly. Sales in the Factory Automation (FA) business declined compared to the same period of the previous fiscal year when there was a high level of demand. In terms of profit, the cost of sales ratio improved despite continued sales of products using high-cost materials procured in the previous fiscal year. Reasons for such improvement were a decrease in transportation costs and price reviews. SG&A expenses increased due to several factors. These include the rise in expenses related to research and development for upcoming new technologies and products. Also, increased personnel expenses and heightened sales activities, which were prompted by active participation in global exhibitions, contributed to the rise in SG&A expenses. However, the increase in SG&A expenses as a percentage of sales was kept to a minimum. Together with the positive effect of exchange rates, this resulted in a year-on-year increase in operating profit.

### Outlook for consolidated business performance for the fiscal year ending March 31, 2024

Our consolidated full-year business performance forecasts for the fiscal year ending March 31, 2024, are net sales of 76,800 million yen (up 8.8% year on year) and operating profit of 4,800 million yen (up 14.1% year on year). In the second half of the fiscal year, there are growing concerns over a global economic slowdown due to continuing inflation and high interest rates as well as due to increasing geopolitical risks such as the situation in Ukraine and the Palestinian issue. Therefore, the severe business environment is also expected to continue.

For net sales, the Company expects an impact from a decrease in demand accompanying the global economic slowdown. On the other hand, in addition to continuing strong sales of new products in the TA market, we will introduce new products in the SG and TA markets in the second half of the fiscal year. At the same time, we continuously strengthen sales activities such as boosting the Mini Exhibition Strategy. In terms of profit, the results for the second half of the fiscal year are expected to be in line with the initial forecasts, in consideration of the many unclear factors overall, while the forecasts for the fiscal year reflect the progress in the first half of the fiscal year. At the same time, we are revising our forecast for the yen exchange rate to depreciate. Based on the aforementioned circumstances, we have made consolidated business performance forecasts.

### Message to shareholders

Based on its medium- to long-term growth strategy, "Mimaki V10," the MIMAKI Group is working to achieve an operating profit margin of 10% by fiscal 2025 while also increasing net sales. In the second half of the fiscal year, despite the uncertain business environment, we will continue to make company-wide efforts to generate new value, incorporate innovative ideas and methods, and create a more sustainable future, based on the Group's management policy "Create."

The interim dividend for the fiscal year ending March 31, 2024 will be 10 yen per share, having taken into account a comprehensive range of factors regarding the outlook for business performance, as well as our policy of stable and consistent shareholder returns.

In closing, we thank you, our shareholders, for your continued guidance and support.

# Digital and environmentally friendly textile production “of the future”

Currently, the majority of the world’s textile products are concentrated in a few producing countries and are produced using analog printing. Analog textile printing is a lengthy production process that requires long lead times for shipment to consumer countries. This requires keeping a large amount of inventory, which entails the risk of unsold products, and significant disposal costs and environmental impact. In addition, production workers are frequently exposed to chemical substances for ink formulation and printing plate cleaning, which poses a safety issue.

Meanwhile, its diversification of design and colors within the textile and apparel industries spurred demands for digital textile printing technologies. With fewer processes and smaller equipment, digital printing enables the production of only the required amount according to demand near the consumption area. This advantage shortens lead times, reducing inventory risk. Additionally, this production method contributes significantly to reducing environmental impact and improving safety by eliminating wastewater discharge from cleaning printing plates, a process inherent in analog printing.

**Mimaki x Sustainability**  
(special website)  
(only available in Japanese)

## Product x Sustainability Tiger600-1800TS

The roll-to-roll sublimation transfer inkjet textile printer “Tiger600-1800TS” made its world debut at ITMA (Milan, Italy) held in June 2023, with sales to start in the fall of 2023. The Company intends to promote the digital transformation of textile printing with its most productive sublimation transfer printer.

The machine is equipped with a newly adopted high-speed drive print head and incorporates our proprietary image quality enhancement technology. The layout change in winding mechanism has resulted in a space-saving of approximately half, facilitating the consideration of multiple unit installations, adaptability to demand fluctuations, and increased production volume.

### Primary features of the “Tiger600-1800TS”

- ✓ **Maximum print speed of 550 m<sup>2</sup>/h**
- ✓ **Advanced transfer paper transport mechanism:**  
Achieves stable printing even on thin transfer paper
- ✓ **Space-saving and lightweight design eases restrictions on installation location**

# Tiger600-1800TS

**High production** Please see here for product details >>>

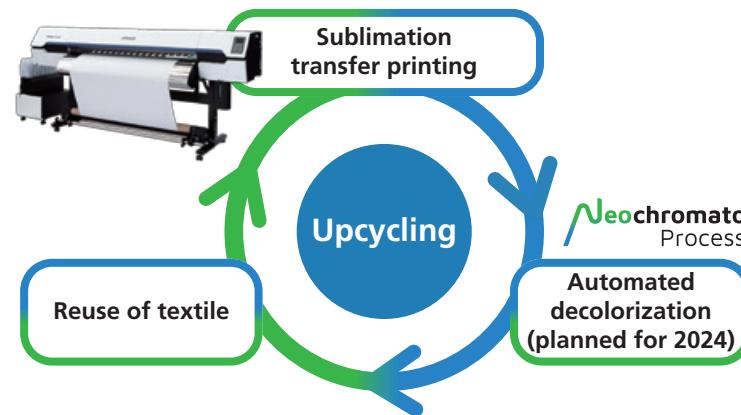

## Technology x Sustainability Neo-Chromato Process

“Neo-Chromato Process” is a technology to reuse the colored polyester textile by discoloring dye-sublimation ink. This technology not only eliminates the need for incineration by reusing polyester textile by changing colors and patterns, but also contributes to reducing the energy required for recycling.

In addition, absorbent paper (absorbent material) that has absorbed ink and decoloring solvents can be disposed of as combustible waste, minimizing water use and water pollution from wastewater.

### Primary features of the “Neo-Chromato Process”

- ✓ **Polyester fabrics dyed by dye sublimation (sublimation transfer) can be decolorized.**
- ✓ **Recycling is not necessary either (upcycling/creative reuse).**
- ✓ **Upcycling reduces CO<sub>2</sub> emissions by 95% and industrial wastewater to nearly zero.**

## Neochromato Process

### Exhibition Report

These products/technologies were unveiled at the exhibition

ITMA 2023 (held in June, in Milan, Italy: hereafter ITMA), which can be called the Olympics of textile machinery, ended on a high note. The Company exhibited the aforementioned “Tiger600-1800TS,” as well as the textile pigment transfer printing system and Neo-Chromato Process. At the press conference, Neo-Chromato Process in particular attracted a lot of attention, giving us a sense of the expectations for sustainability in the textile market. ITMA marked a major turning point for the textile industry toward sustainability and digitization. This exhibition now is essential for a future that demands sustainability from sustainable materials and environmentally friendly processes to waste reduction and responsible production.

3D

### Collaboration with Autodesk, Inc. for 3D printer exhibitions in four countries including Japan

In collaboration with Autodesk, Inc. (headquartered in the U.S.; hereafter "Autodesk"), a CAD software manufacturer with a global market share, we exhibited at 3D printer exhibitions held in four countries around the world, including Japan, from May to June 2023. At each exhibition, we offered customers ways to bring their 3D design, engineering, and entertainment 3D printed models to life using Autodesk's 3D rendering technology and our full-color 3D printing technology.

Mimaki

### Introduced Shinshu University Short-term Reskilling Program

Shinshu University (Matsumoto-shi, Nagano Prefecture; President: Soichiro Nakamura; hereafter "Shinshu University") has established a new educational program for working adults, the "Short-Term Reskilling Program," targeting companies, etc. We signed a contract in March 2023 as the first company to introduce this program. This initiative introduces a tailor-made educational training program that enables companies to customize content based on their needs. Shinshu University aims to contribute to the development of local high-level human resources by providing expertise in education and research through its faculty members. The employee training course for the Company began in June 2023, with lectures delivered in turn by professors from the Faculty of Engineering at Shinshu University.

Mimaki

### Established a sales subsidiary in the Socialist Republic of Vietnam

The Socialist Republic of Vietnam has experienced rapid economic growth in recent years, and we expect further growth in demand for products for the SG, IP, and TA markets. The newly established sales subsidiary will play a central role in strengthening the network of distributors in the country and enhancing service training and user support for distributors in order to expand sales of our products and improve customer satisfaction.

Mimaki

### Opened the Okinawa Sales Office as the 17th domestic sales office in Japan

Sales and services in Okinawa Prefecture used to be handled by the Fukuoka Sales Office of the Company. This year we have opened Okinawa Sales Office with a showroom as our 17th sales office in Japan, and a specialist for customer problem-solving and maintenance services is assigned to the site. We aim to further increase customer satisfaction by providing technical and detailed solution proposals and maintenance services to customers in close contact with this region.

Among the 17 sustainable development goals (SDGs) adopted by the United Nations in 2015, MIMAKI will contribute to seven of them using its inkjet technology.

► The MIMAKI Group is committed to resource recycling and related technology as part of our response to the need for sustainability.

Up to this point, we have used proprietary inkjet technology to promote the growth of digital on-demand printing, in turn contributing to fulfilling the needs of society and the environment. Going forward, we will continue to effectively harness the digital transformation (the shift to digitization that includes the value chain and leads to new added value). In this way, we will be able to respond promptly to the needs of society and the environment that inspire us to add high-value such as unattended operation, saving labor, higher speeds and quality, and waterless printing—all technologies that are expected to grow.

► Toward a sustainable society: with digital on-demand printing

By using proprietary raster and vector technologies, we will drive the further development of digital on-demand printing.

#### Saving water

Water pollution caused by dyes can be eliminated using inkjet printing, while sublimation transfer printing also enables water savings

#### Simplified logistics flows

Logistics flows are shortened by digital on-demand printing

#### Lower inventory losses

Use of inkjet printing minimizes lost inventory

#### More efficient production plants

Inkjet printing makes it possible to have environmentally conscious production plants

#### Developing and manufacturing environmentally friendly inks

Environmentally friendly eco-ink also protects the health of the operator

#### Environmentally aware ink cartridges

Free collection and recycle of used ink cartridges, and adoption of eco-ink cartridges

### MIMAKI and the UN's SDGs: Initiatives to date

#### Won the Industrial Packaging Award at the Japan Packaging Contest 2023

-We commercialized a product jointly with COMPACK SYSTEM Co., Ltd. of Ueda-shi, Shinshu to reduce 38 tons/year of CO<sub>2</sub> emissions-

The paper ink cartridge that we jointly commercialized with COMPACK SYSTEM Co., Ltd. (Head office/Ueda-shi, Nagano Prefecture, Representative Director and President/Yoshihiko Suzuki), which manufactures packaging paper such as cardboard, won the Industrial Packaging Award at the Japan Packaging Contest 2023 sponsored by Japan Packaging Institute under the theme "Contribute to Sustainability! Paper Ink Cartridge." By replacing the material of ink cartridges from plastic to paper, we achieved a plastic reduction rate of 68% (by MIMAKI standards). Specifically, reducing plastic by 29.2 tons and CO<sub>2</sub> emissions by 38 tons per year helps contribute to the realization of a decarbonized society.

\* Calculated based on sales results in Japan

**Corporate History**

- 1975** August MIMAKI ENGINEERING was founded as a private limited company.
- 1981** May Reorganized into a stock company, MIMAKI ENGINEERING Co., Ltd.
- 1983** December Started development of the A2 flatbed pen plotter (RY-1003) for OEMs.
- 1985** February Started sales of the A2 flat pen plotter under the Hokusai brand.
- 1986** March Started operation of the Kazawa Factory.
- 1995** July Founded MIMAKI ENGINEERING (TAIWAN) Co., Ltd.
- 1999** January Received ISO 9001 certification.
- September Founded MIMAKI USA, INC.
- 2003** October Opened the Nagano Development Center.
- 2004** April Founded MIMAKI PRECISION Co., Ltd.
- April Founded MIMAKI EUROPE B.V.
- September Acquired Bokuya Factory in Tomi-shi, Nagano Prefecture.
- 2005** April Opened the Technical Call Center.
- 2006** April Acquired GRAPHIC CREATION Co., Ltd. as a subsidiary.
- August Relocated the Head Office to Shigeno-Otsu, Tomi-shi, Nagano Prefecture.
- 2007** March Listed on the JASDAQ Securities Exchange.
- December Founded MIMAKI IJ TECHNOLOGY CO., Ltd.
- 2008** July Acquired Mimaki Deutschland GmbH as a subsidiary.
- 2009** January Received ISO14001 certification.
- June Founded Shanghai Mimaki Trading Co., Ltd.
- 2010** August Founded MIMAKI PINGHU TRADING CO., LTD.
- 2011** November Founded PT. MIMAKI INDONESIA.
- 2013** April Founded MIMAKI AUSTRALIA PTY LTD.
- April Founded MIMAKI SINGAPORE PTE. LTD.
- July Founded MIMAKI INDIA PRIVATE LIMITED.
- 2015** March Moved our shares to the Tokyo Stock Exchange First Section.
- May Opened the Hachioji Development Center.
- July Opened Shigeno Showroom in Tomi-shi, Nagano Prefecture.
- 2016** April Founded MIMAKI EURASIA DIJITAL BASKI TEKNOLOJILERI PAZARLAMA VE TICARET LIMITED SIRKETI
- July Opened the JP Demonstration Center.
- July Opened the TA and IP Lab Center.
- August
- October Acquired Mimaki La Meccanica S.p.A. as a subsidiary.
- 2017** February Founded Mimaki Lithuania, UAB.
- June Founded Mimaki Bompan Textile S.r.l.
- 2018** October Acquired ALPHA DESIGN CO., LTD as a subsidiary.
- November Acquired LUCK'A Inc. as a subsidiary.
- 2019** March Founded MIMAKI (THAILAND) CO., LTD.
- 2022** March Acquired MICRO TECH CORP. as a subsidiary.
- April Transitioned to the Tokyo Stock Exchange Prime Market.
- June Founded MIMAKI VIETNAM CO., LTD.
- July Opened Okinawa Sales Office

**Consolidated performance highlights for the first half of the fiscal year ending March 2024**

**Performance highlights by market for the first half of the fiscal year ending March 2024**

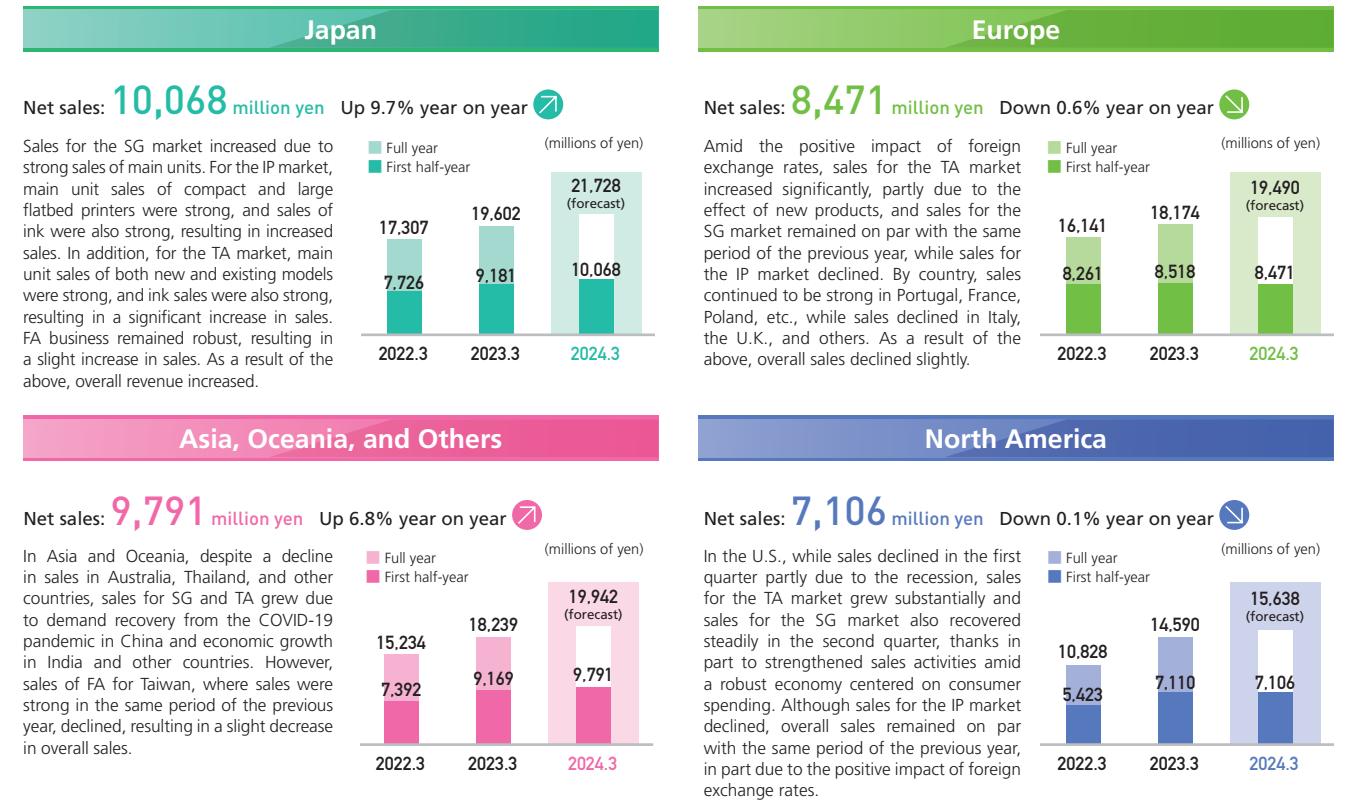

While main units sales of the flagship model and entry model increased, sales of existing models declined. However, revenue increased mainly due to strong performance of ink sales and positive impact of foreign exchange rates.

Sales of mainly compact flatbed printers were down compared to the same period of the previous year, when sales of new models expanded, but revenue was on par with the same period of the previous year due to higher ink sales and the positive impact of foreign exchange rates.

Sales of new products introduced mainly in developed countries in the period under review were strong, and ink sales were also firm, resulting in a substantial increase in revenue.

**Market conditions by region for the first half of the fiscal year ending March 2024**

**Business performance for the first half of fiscal year ending March 2024**

We provide products and services to customers in approximately **150** countries and regions

Consolidated net sales outside Japan **25,368 million yen**

Percentage of consolidated net sales **71.6%**
